

NowSpeak Mobile TTS for BlueCore™

**Text-to-speech designed
for Bluetooth® devices**

Features

- Natural, fluent speech
- High quality wideband audio
- All major languages supported
- Small footprint allows multiple languages on a device
- Available on BC3MM & BC5MM
- Supports CSR audio plug-in architecture

NowSpeak Mobile TTS for BlueCore™ brings Bluetooth devices to life with caller announcement, device status and confirmation of user actions all spoken in clear, natural and fluent voices.

Text-to-speech enhances the user's experience. The user can hear who is calling and decide whether or not to answer, is given guidance through the pairing process and can be kept informed about the state of the device, for instance, battery level and mobile network connection.

NowSpeak's world leading text-to-speech technology has been optimised for the CSR BlueCore™ single chip Bluetooth® solution. With the smallest memory footprint of any BlueCore TTS coupled with wideband audio output it enables you to have the highest quality speech solution on the lowest cost platform.

NowSpeak is a CSR eXtension Partner
