

NowSpeak Mobile TTS for BlueCore

Text-to-speech designed
for Bluetooth devices

Features

- High quality voices producing natural, fluent speech
- Wideband audio generated in real-time
- 12 major languages supported
- Small footprint allows multiple languages on a device
- Support for pre-recorded prompts
- Compatible with CSR audio plug-in architecture
- Reference design for TTS plug-in integration

NowSpeak Mobile TTS for BlueCore brings Bluetooth devices to life with spoken caller names, numbers and phone names. Device status and confirmation of user actions can also be provided using clear, natural and fluent TTS voices or pre-recorded prompts.

Text-to-speech enhances the user's experience. The user can hear who is calling and decide whether or not to answer, is given guidance through the pairing process and can be kept informed about the state of the device, such as battery level and connection status.

NowSpeak's world leading text-to-speech technology has been optimised for the CSR BlueCore single chip Bluetooth platform. With the smallest memory footprint of any BlueCore TTS solution and coupled with wideband audio output it enables you to have the best quality text-to-speech interface on a low cost platform.

NowSpeak is a CSR eXtension Partner
